

ImagineTime System Requirements

Workstation Requirements:

- Minimum - Windows XP, or later OS with 512 MB of RAM
- Optimal - Windows XP or later with 1GB or more RAM
- Windows Vista and Windows 7, 8, 8.1 and 10 are supported
- Requires minimum 1366 x 768 screen resolution

LAN Requirements: Note 1

- Minimum – Mapped drive on a peer-to-peer cabled network, or dedicated file server running Windows XP or later, or Linux OS.
- Better - 10/100 network connection to Windows Server 2003, 2008, 2008r2, 2012 & 2012r2
- Optimal - 1 gigabit network connection to Windows 2003 or later server.

Terminal Server Requirements (also works on remote web workplace "rdweb"): Note 1

- Windows 2003, 2008, 2008r2, 2012 and 2012r2 terminal server.
- Also supports Citrix server.
- In general, 15 concurrent users require about 3-4 GB of RAM at the server. Double that for 30 users. These requirements are approximations of what you will need. Please check with your network technician to confirm these estimates.

Note 1: Not Applicable for Single User Stand Alone Licenses

**** Current service packs are required for your operating system and any installed Microsoft Office products****
